

Designing Interactive Reports in Power BI Desktop

Agenda

- Working with the Report Designer
 - Designing Interactive Reports using Slicers
 - Using Conditional Formatting
 - Designing Reports using Bookmarks
 - Importing Custom Visuals
 - Using Custom Report Themes
 - Publishing Power BI Reports
 - Creating Reports from Shared Datasets

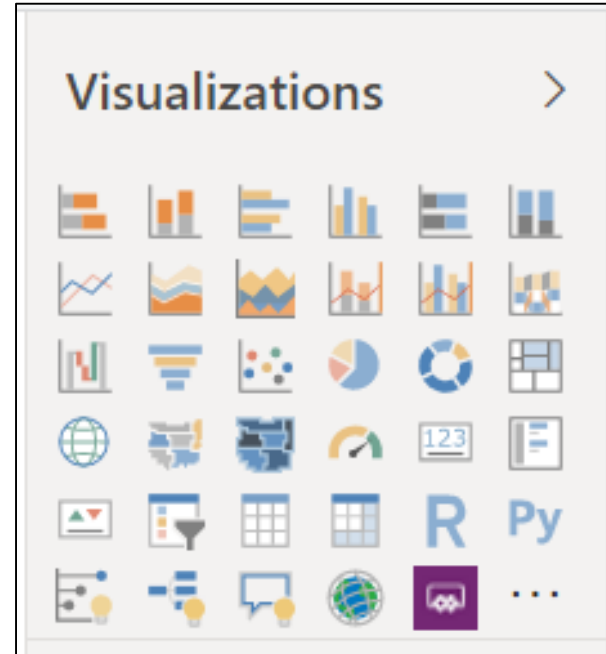

Creating Reports

- Power BI Desktop project contains one report
 - Report within project can contain multiple pages
 - Report pages contains visuals
- Reports can be created using filters
 - You can add visual level filters
 - You can add page level filters
 - You can add drillthrough filters
 - You can add report level filters

Built-in Visualization Types

- Bar charts and Column charts
- Line chart and Area chart
- Scatter chart and Combo charts
- Ribbon chart
- Waterfall chart
- Funnel chart
- Pie charts and Doughnut chart
- Treemap
- Map, Filled Map and Shape map
- Gauge
- Card and Multi-row Card
- Slicer
- Table and Matrix
- R script visual
- Python script visual
- Key influencers
- Decomposition Tree
- Q&A
- PowerApps for Power BI

Example Visual 1: Funnel

- Visualizes distribution across categories as percentage of top value

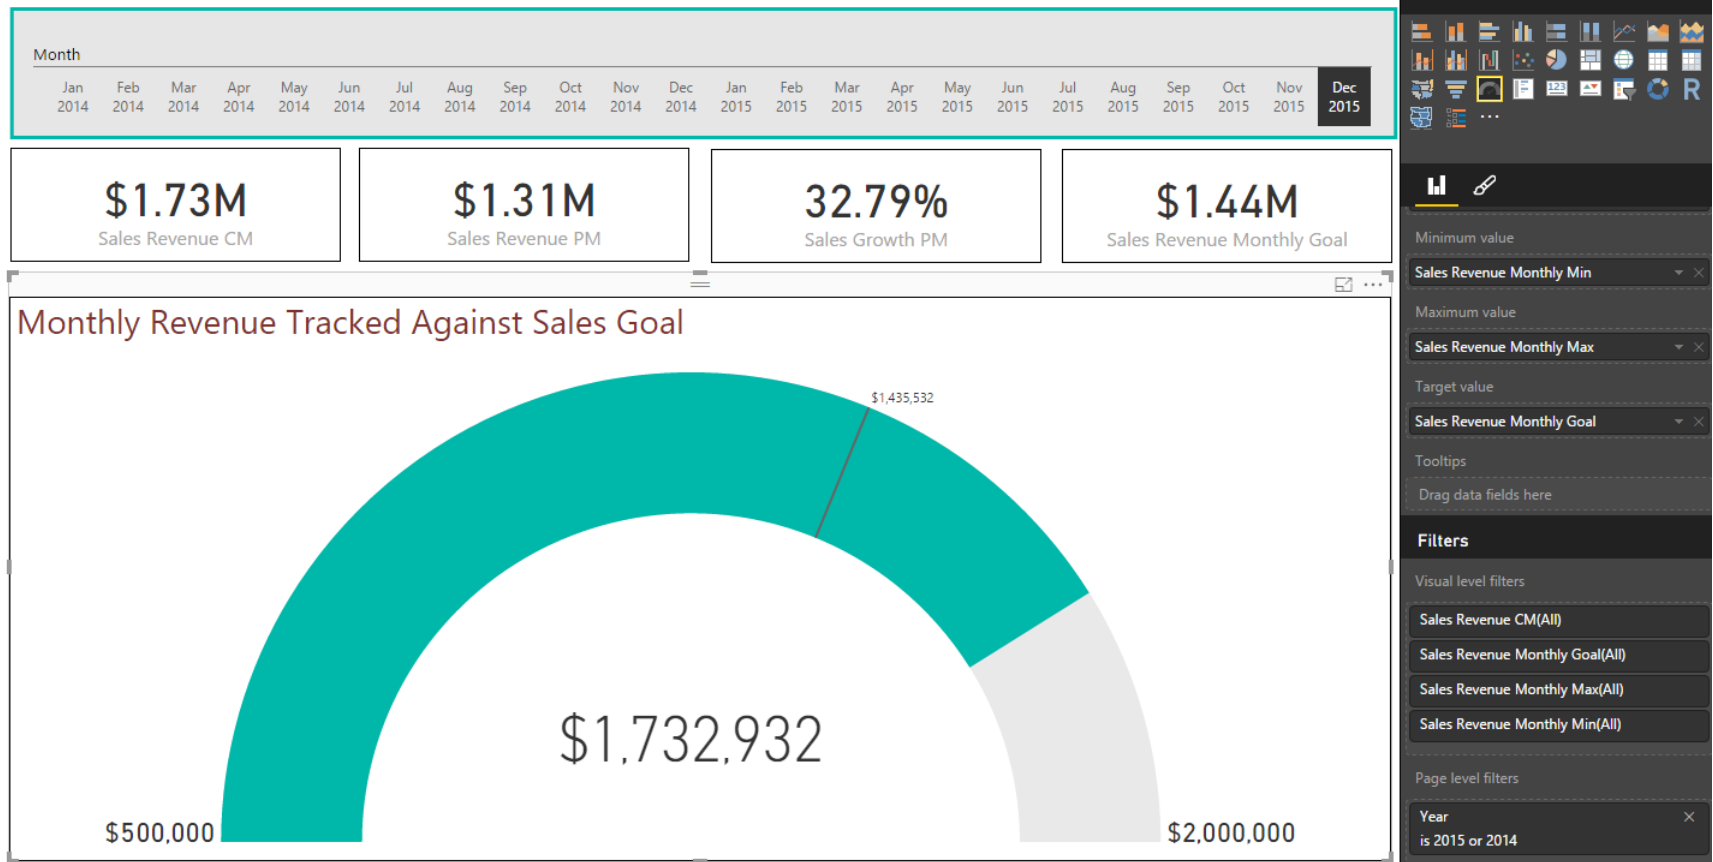

Example Visual 2: Waterfall

- Visualizes series-based data with positive and negative values

Example Visual 3: Gauge Visual

- Visualizes how measured value is tracking against goal or budget

Report Designer Modes and Panes

- **Show Gridlines** mode adds visual guides to report
- **Snap Objects to Grid** mode helps with object placement
- **Lock Objects** mode used to prevent accidental moving
- **Bookmarks Pane** used to create and manage bookmarks
- **Selection Pane** used to select, order, hide & show visuals
- **Sync slicers** pane used for advanced slicer control
- **Field Properties** used to add field description

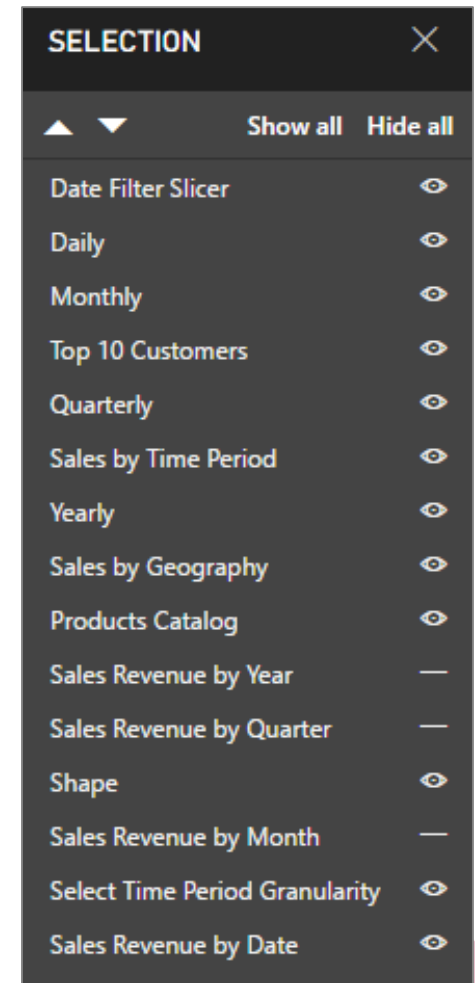

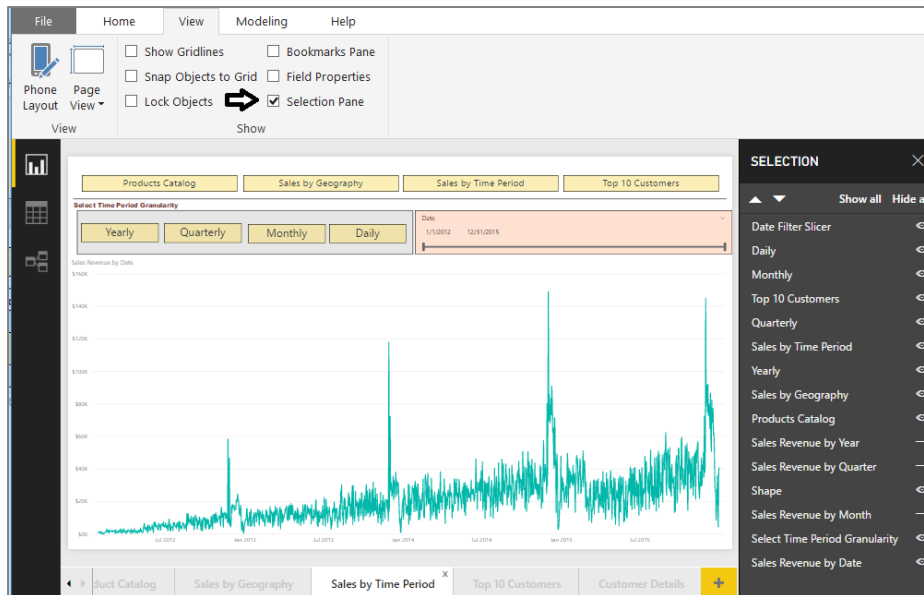

Lock Objects Mode

- Prevents accident movement of report objects
 - Locks Objects setting is not saved at project level

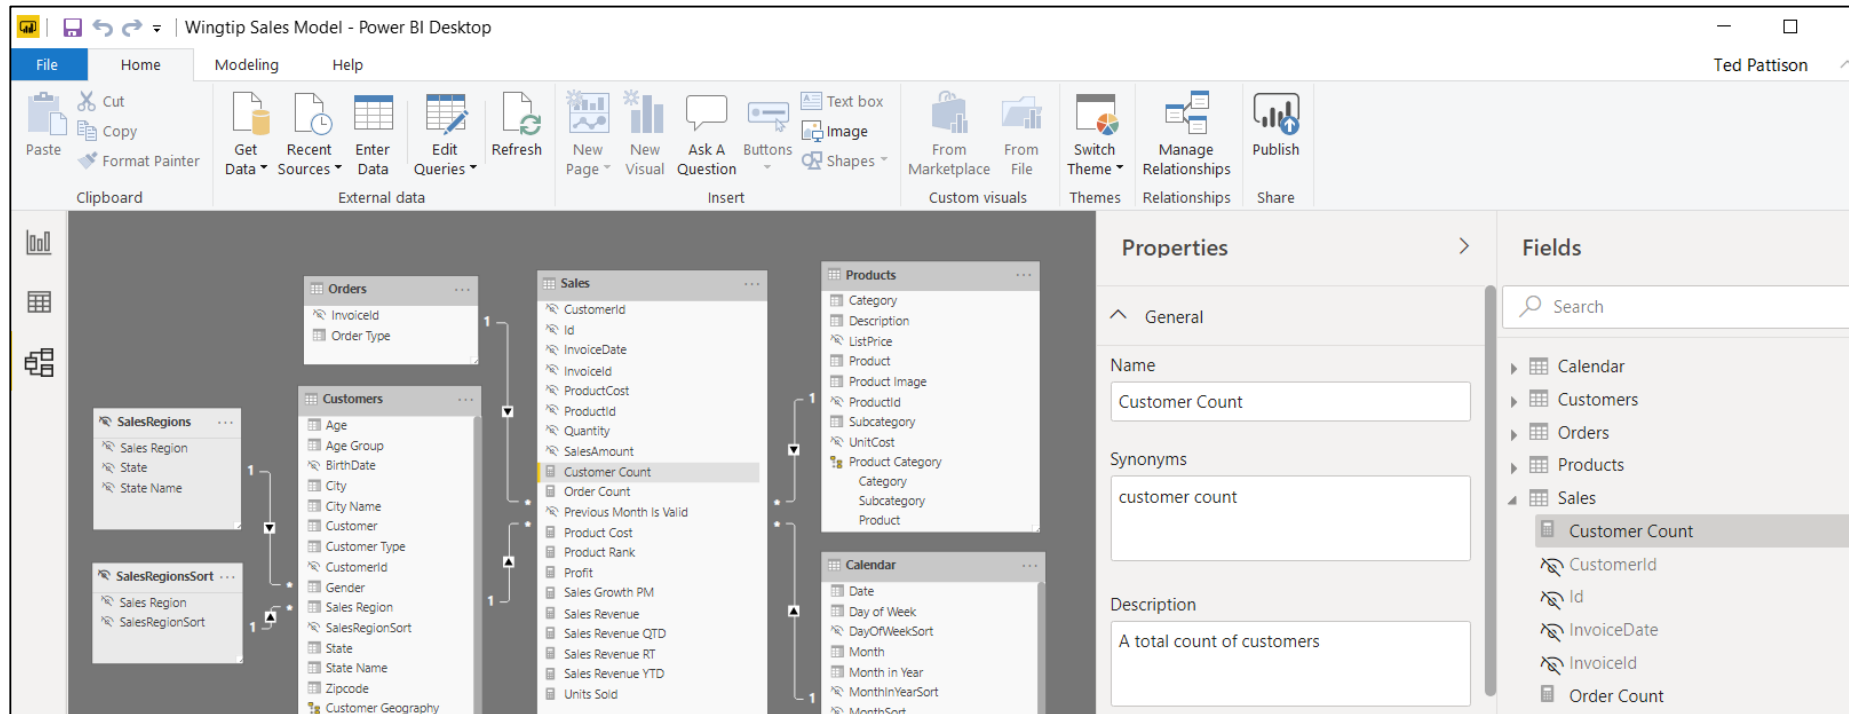

Selection Pane

- Provides control over object on a page
 - You can control whether visual is visible or hidden
 - You can change ordering to control what is on top

Field Properties Pane

- Allows data model author to add table and field description
- Using the Fields Properties pane
 1. Navigate to Model view
 2. Select a table or field
 3. Edit property values

Agenda

- ✓ Working with the Report Designer
- Designing Interactive Reports using Slicers
 - Using Conditional Formatting
 - Designing Reports using Bookmarks
 - Importing Custom Visuals
 - Using Custom Report Themes
 - Publishing Power BI Reports
 - Creating Reports from Shared Datasets

Designing Reports with Interactive Filtering

- Slicers
 - Provide report consumers with intuitive filtering
- Visual Highlighting
 - Filtering applied when user clicks on a visual data element
- Drilldown Mode
 - Allows report consumer to drill into field hierarchy
e.g. Sales Region > State > City > Zipcode
- Drillthrough Pages
 - Allows report consumer to navigate to drillthrough page

Slicer with Text Field

- Slicer support List and Dropdown modes
 - Slicer create in List mode by default
 - Slicer switched to dropdown mode to conserve vertical space

State Name

- ☐ Alabama
- ☐ Arizona
- ☒ California
- ☐ Colorado
- ☐ Connecticut
- ☐ Florida
- ☐ Georgia
- ☐ Louisiana
- ☐ New Mexico
- ☐ New York
- ☐ North Carolina
- ☐ Ohio
- ☐ Oregon
- ☐ Pennsylvania
- ☐ Rhode Island

State Name

- ☐ Alabama
- ☐ Arizona
- ☒ California
- ☐ Colorado

List
Dropdown

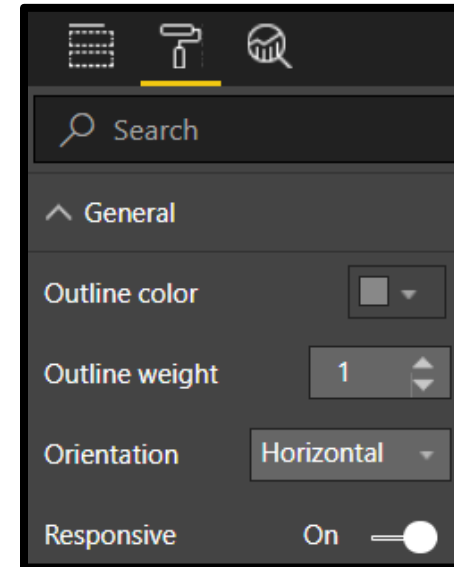

State Name

California

Horizontal Responsive Slicers

- Slicer **Orientation** can be set to **Horizontal**
 - Horizontal slicer supports **Responsive** mode
 - Makes it possible to show many slicer choices at once
 - provides best filtering experience for mobile devices

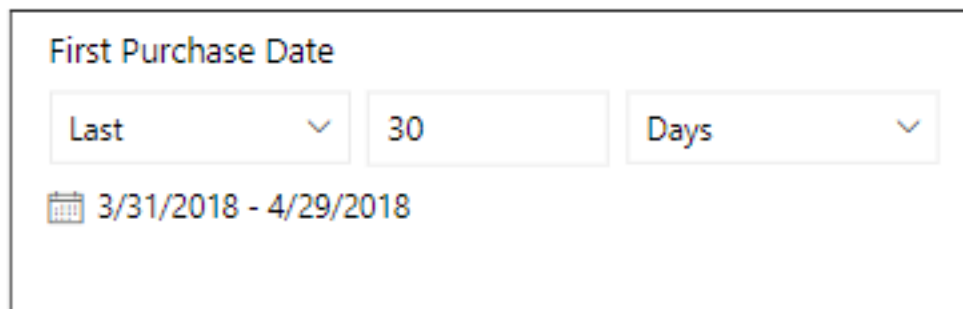

Slicers with Date Fields

- Slicers with Date fields provide 7 different modes
 - Between, Before and After provide sliders and date pickers

The image shows a date slicer interface. On the left is a vertical menu with seven options: 'Between' (highlighted), 'Before', 'After', 'List', 'Dropdown', and 'Relative'. To the right, the 'Between' mode is active, displaying the title 'First Purchase Date'. Below the title are two date input fields containing '4/1/2012' and '10/1/2012'. Below these fields is a horizontal slider with two circular handles positioned at the dates shown in the input fields.

- Relative mode filter based on current date (e.g. last 30 days)

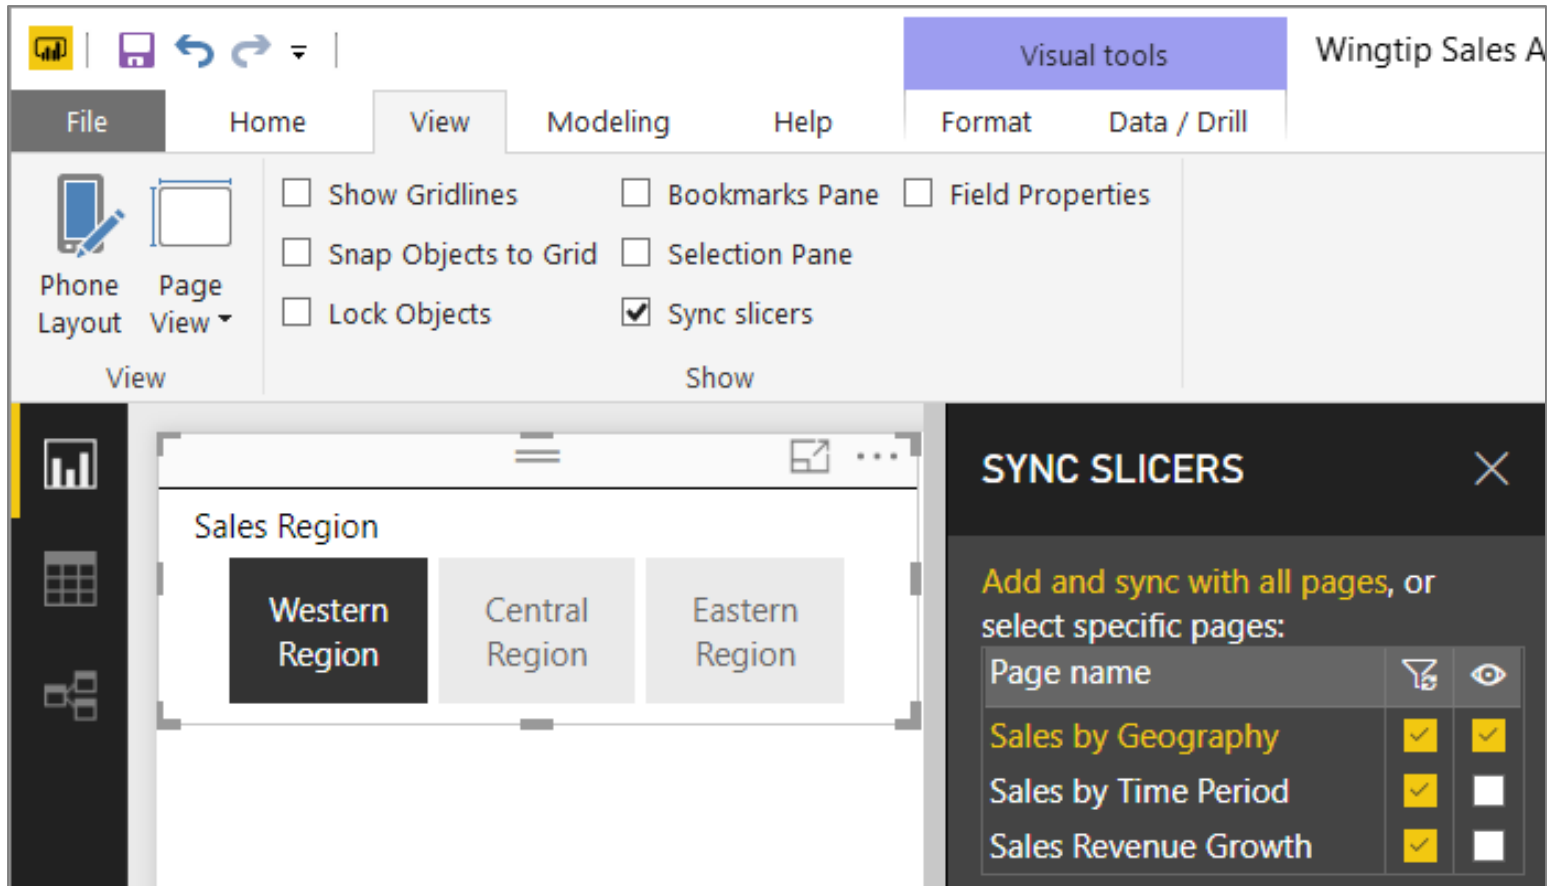

The image shows a date slicer interface in 'Relative' mode. The title 'First Purchase Date' is at the top. Below it are three input fields: a dropdown menu with 'Last' selected, a text box with '30', and another dropdown menu with 'Days' selected. Below these fields, a date range is displayed with a calendar icon: '3/31/2018 - 4/29/2018'.

Slicer Sync

- Slicer visual & filtering can be synchronized across pages

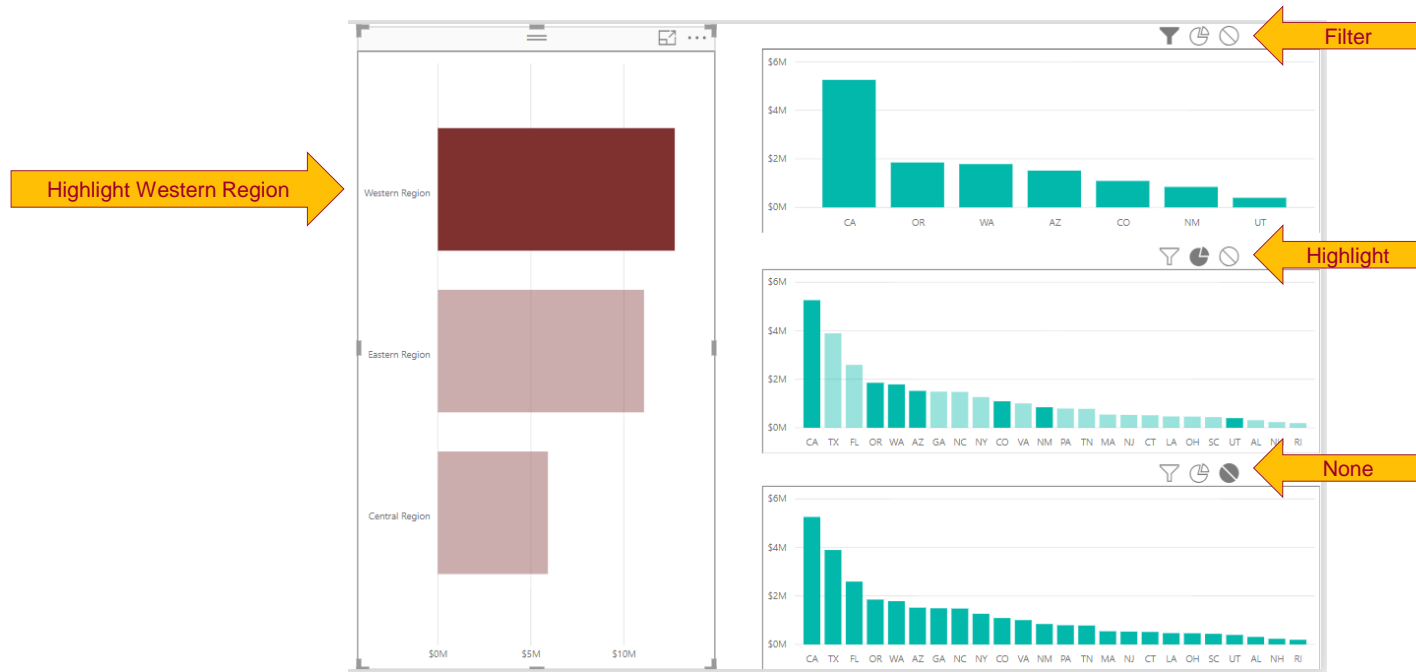

Edit Highlight Interactions Across Visuals

- Click **Edit interactions** button on **Format** tab of ribbon

- Select a visual and then configure interactions with other visuals

User Interaction using Drill Actions

- Drill Actions supported when using hierarchies
 - You must enable drilldown mode in visual

Agenda

- ✓ Working with the Report Designer
- ✓ Designing Interactive Reports using Slicers
- Using Conditional Formatting
 - Designing Reports using Bookmarks
 - Importing Custom Visuals
 - Using Custom Report Themes
 - Publishing Power BI Reports
 - Creating Reports from Shared Datasets

DEMO

Using Conditional Formatting

Agenda

- ✓ Working with the Report Designer
- ✓ Designing Interactive Reports using Slicers
- ✓ Using Conditional Formatting
- Designing Reports using Bookmarks
 - Importing Custom Visuals
 - Using Custom Report Themes
 - Publishing Power BI Reports
 - Creating Reports from Shared Datasets

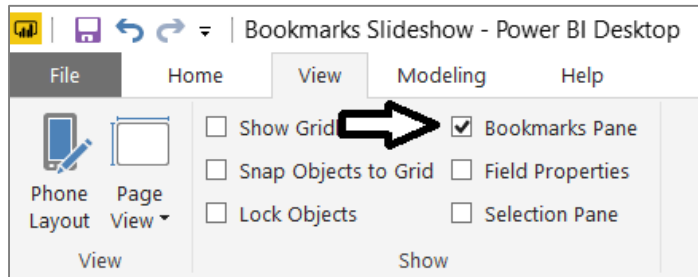

What are Bookmarks

- Snapshot of recorded settings which can include...
 - Current page
 - Filters
 - Slicers
 - Visual sort order
 - Drill location
 - Visibility
 - Spotlighting
- Bookmarks provide the foundation for story telling
 - Bookmarks are supported in reports only
 - Bookmarks are **NOT** supported in dashboards

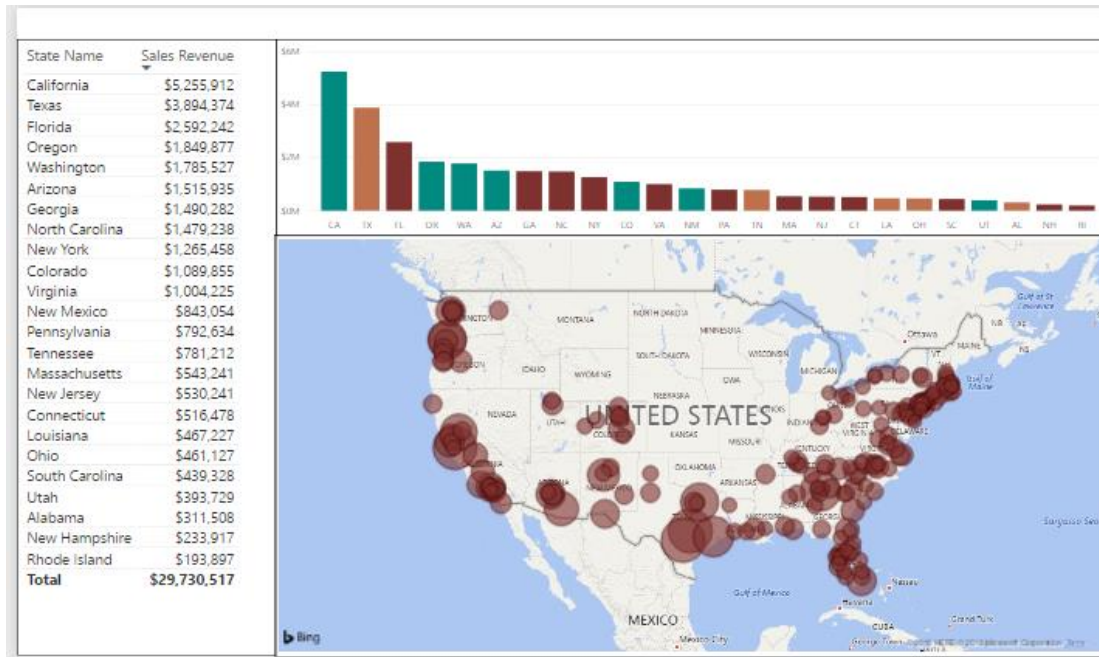

Bookmarks Pane

- Provide ability to create and manage bookmarks

Bookmarks as a Slide Show

- Bookmarks can be viewed as slide show
 - Start slide show by clicking View button
 - Consumer can step through one bookmark at a time

Bookmark 1 of 17

US Sales Summary

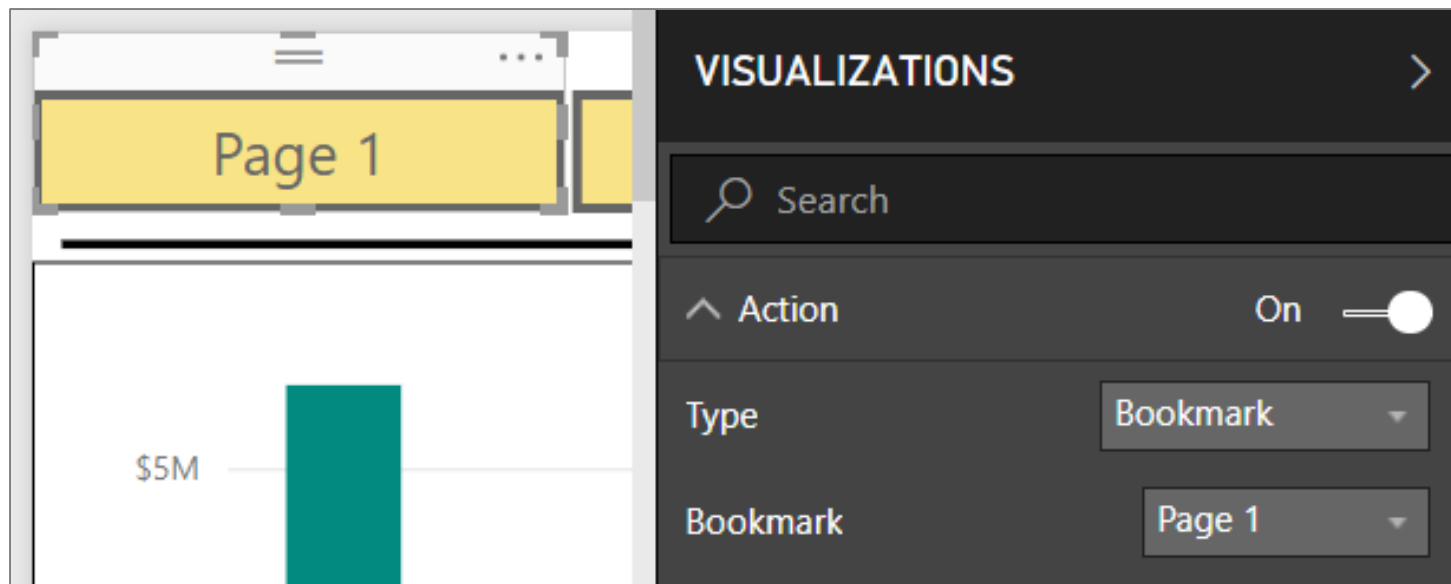

Creating a Button

- Buttons can be added to report pages to apply a bookmark
 - Button can be create with icon and/or text

Button Action Used to Apply Bookmark

- Button action can apply a bookmark
 - Button responds to standard click in Power BI Service
 - Button requires CONTROL + click in Power BI Desktop

Bookmarks Types

- Bookmarks can capture or ignore certain types of data
 - Data (filtering and slicers)
 - Display (visible or hidden)
 - Current Page (page navigation)

DEMO

Designing Reports using Bookmarks

Agenda

- ✓ Working with the Report Designer
- ✓ Designing Interactive Reports using Slicers
- ✓ Using Conditional Formatting
- ✓ Designing Reports using Bookmarks
- Importing Custom Visuals
 - Using Custom Report Themes
 - Publishing Power BI Reports
 - Creating Reports from Shared Datasets

Custom Visuals for Power BI

- Power BI Framework for Visuals is Extensible
 - Developers can extend Power BI with Custom Visuals
 - Microsoft Hosts gallery of custom visuals
 - Gallery located at <https://appsource.microsoft.com>

Histogram

- Custom Visual Example 1

Hierarchy Slicer

■ Custom Visual Example 2

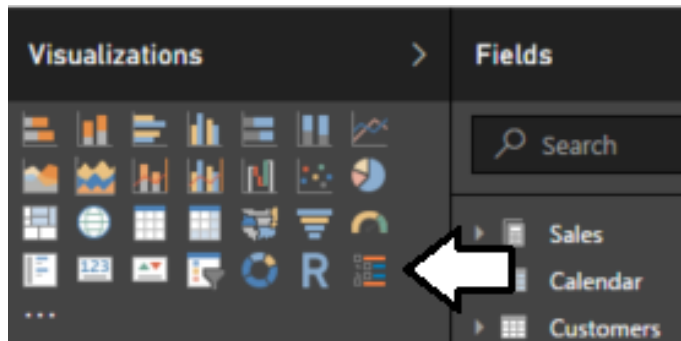

Importing a Custom Visual

- Import custom visual into Power BI Desktop project
 - Execute **Import > Power BI Custom Visual** menu command

- After import, Custom Visual appears in **Visualizations** list

Agenda

- ✓ Working with the Report Designer
- ✓ Designing Interactive Reports using Slicers
- ✓ Using Conditional Formatting
- ✓ Designing Reports using Bookmarks
- ✓ Importing Custom Visuals
- Using Custom Report Themes
 - Publishing Power BI Reports
 - Creating Reports from Shared Datasets

Report Themes

- Report can be styled using report theme
 - Provides consistency across reports for styling and branding
 - Report theme defined using JavaScript Object Notation (JSON)
 - Today report themes must be defined using JSON editor
 - Microsoft plans to release WYSIWYG theme designer later in 2018

```
CPT Demo Report Theme.json  -P X
{
  "name": "CPT Demo Report Theme",
  "background": "#fff8dd",
  "foreground": "#9F1B30",
  "tableAccent": "#fbc737",
  "dataColors": [ "#9F1B30", "#D16B2C", "#FEBF0F", "#fdae61", "#abdda4", "#66c2a5",
    "#3288bd", "#5e4fa2", "#bbbbbb", "#999999", "#666666", "#333333" ],
  "visualStyles": {
    "*": {
      "*": {
        "*": [ {
          "fontSize": 8,
          "fontFamily": "Cambria Math",
          "color": {
            "solid": {
              "color": "#000000"
            }
          }
        }
      ]
    }
  }
}
```

DEMO

Working with Report Themes

Agenda

- ✓ Working with the Report Designer
- ✓ Designing Interactive Reports using Slicers
- ✓ Using Conditional Formatting
- ✓ Designing Reports using Bookmarks
- ✓ Importing Custom Visuals
- ✓ Using Custom Report Themes
- Publishing Power BI Reports
 - Creating Reports from Shared Datasets

Designing Reports for Mobile Devices

- Many reports will not render properly on mobile devices
 - Phone Layout used to create separate version for mobile devices

Designing a Phone Layout

- Phone layout view allows you to select specific visuals
 - Only include report visuals that render correctly on mobile devices
 - You position visuals according to form factor of mobile device

Publishing a Power BI Desktop Project

- Power BI Desktop provides **Publish** command
 - Used to publish project to Power BI service

- Requires logging into your Office 365 account

- Published articles added to a specific workspace

Publish to Web

- **Publish to Web** command available on reports
 - Not supported for reports and datasets which implement RLS

- **Publish to Web** command used to generate embed codes

Generating Embed Codes

- Used to provide anonymous access to report
 - Provide link which can be posted, emailed or texted
 - Provides **iFrame** HTML element for embedding in public web site

Success! ✕

DEMO

Using the Publish to Web and Publish to SharePoint Features

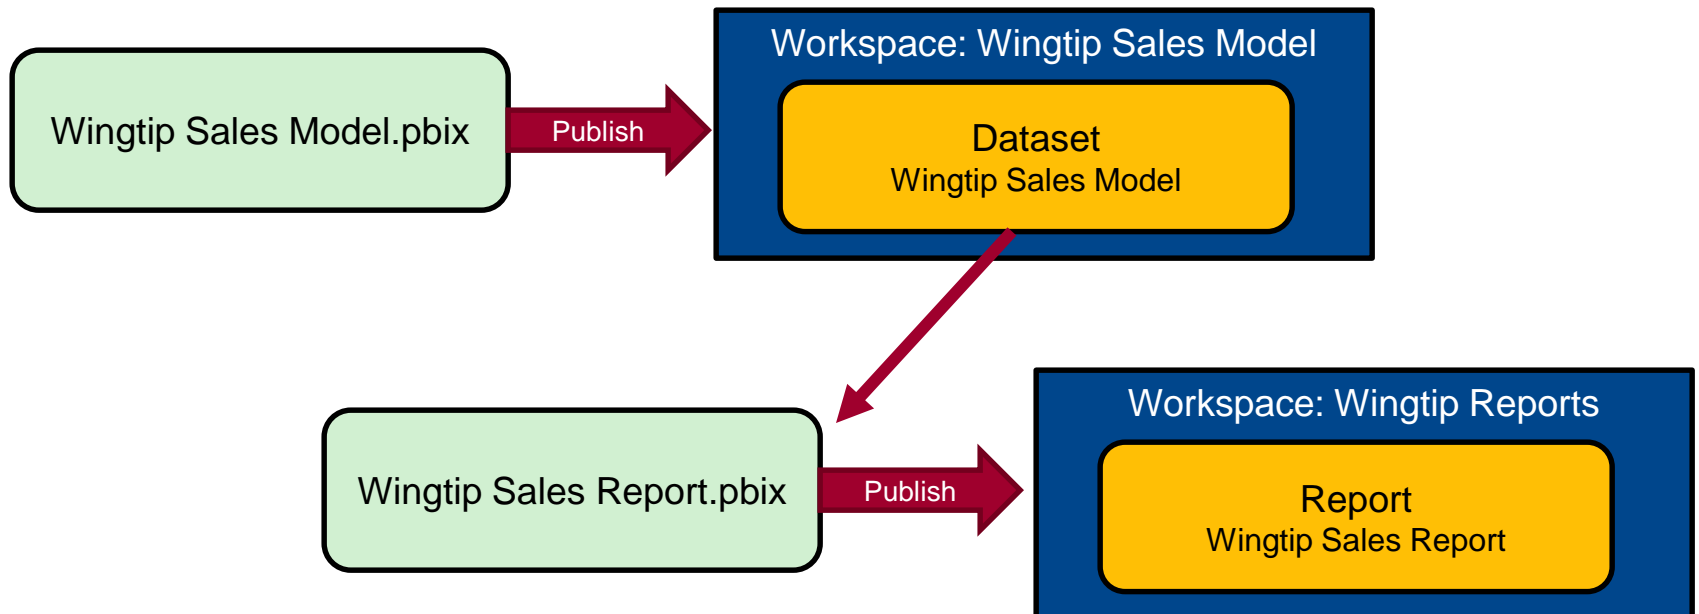

Agenda

- ✓ Working with the Report Designer
- ✓ Designing Interactive Reports using Slicers
- ✓ Using Conditional Formatting
- ✓ Designing Reports using Bookmarks
- ✓ Importing Custom Visuals
- ✓ Using Custom Report Themes
- ✓ Publishing Power BI Reports
- Creating Reports from Shared Datasets

Creating Reports using Shared Datasets

- Datasets can be shared across workspaces
 - Makes it possible to separate datasets from reports
 - One team can build and publish datasets
 - Other teams can build reports on those datasets

DEMO

Creating a Power BI Report using a Shared Datasets

Summary

- ✓ Working with the Report Designer
- ✓ Designing Interactive Reports using Slicers
- ✓ Using Conditional Formatting
- ✓ Designing Reports using Bookmarks
- ✓ Importing Custom Visuals
